# Global Activities of UN-GGIM PSN

- 1) The UN-GGIM: Private Sector Network (PSN) actively engaged in various initiatives, notably contributing to the UN-GGIM sessions focusing on the Future of Geospatial Ecosystem during the 14th session at New York, August 2024.
- 2) The PSN involvement extends to the drafting committee for the Future of Geospatial Information Ecosystem, a document presented at the the 14th session of UN-GGIM.
- 3) Additionally, the PSN made significant contributions to Working Group 4 on Integrated Geospatial Information Framework (IGIF), providing invaluable insights from the private sector to aid in IGIF implementation including the IGIF HLG on Financing pathway.
- 4) With a commitment to furthering IGIF, the PSN developed a position paper delineating its role in IGIF development and enhancement at the 14th session of UN-GGIM.
- 5) A jointly authored paper on GeoAI, co-authored by PSN and the Academic Network, is scheduled for publication.

## Abstract

Geospatial Artificial Intelligence (GeoAI) is set to transform academia and industry by offering new research and application opportunities. Here, we design a quantitative survey to explore and understand the current state of GeoAI and discern avenues for strengthening capacity and fostering a collaborative environment. We also develop and enhance GeoAI and ethical guidelines and best practices frameworks. This study's insights were from 120 participants

## GEOAI Skill Needs Survey – Private Sector

- By Lokendra Chauhan  
Founder, Qen Labs Inc.

# Geographical Representation

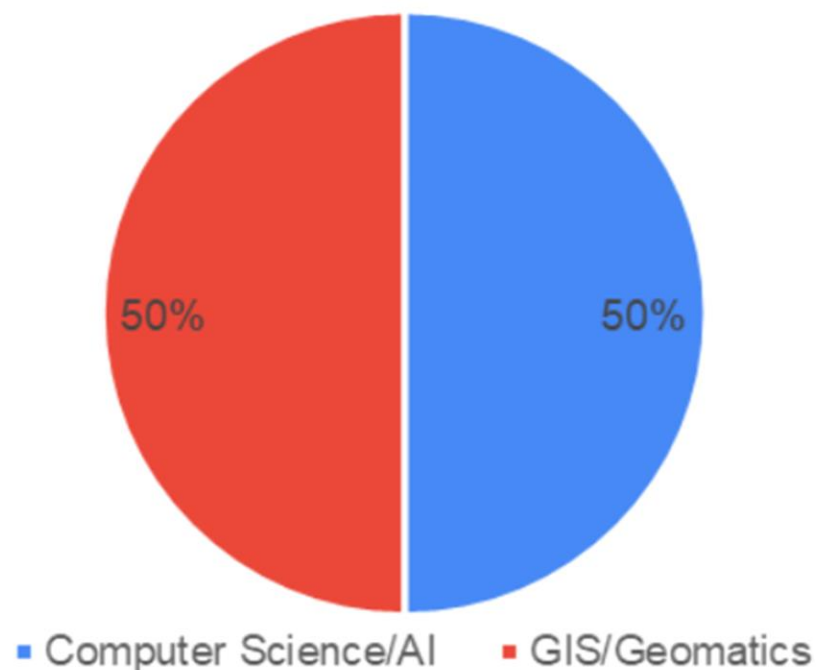

# Findings from Private Sector Survey

Do University Graduates have Required Skills for GeoAI Jobs?

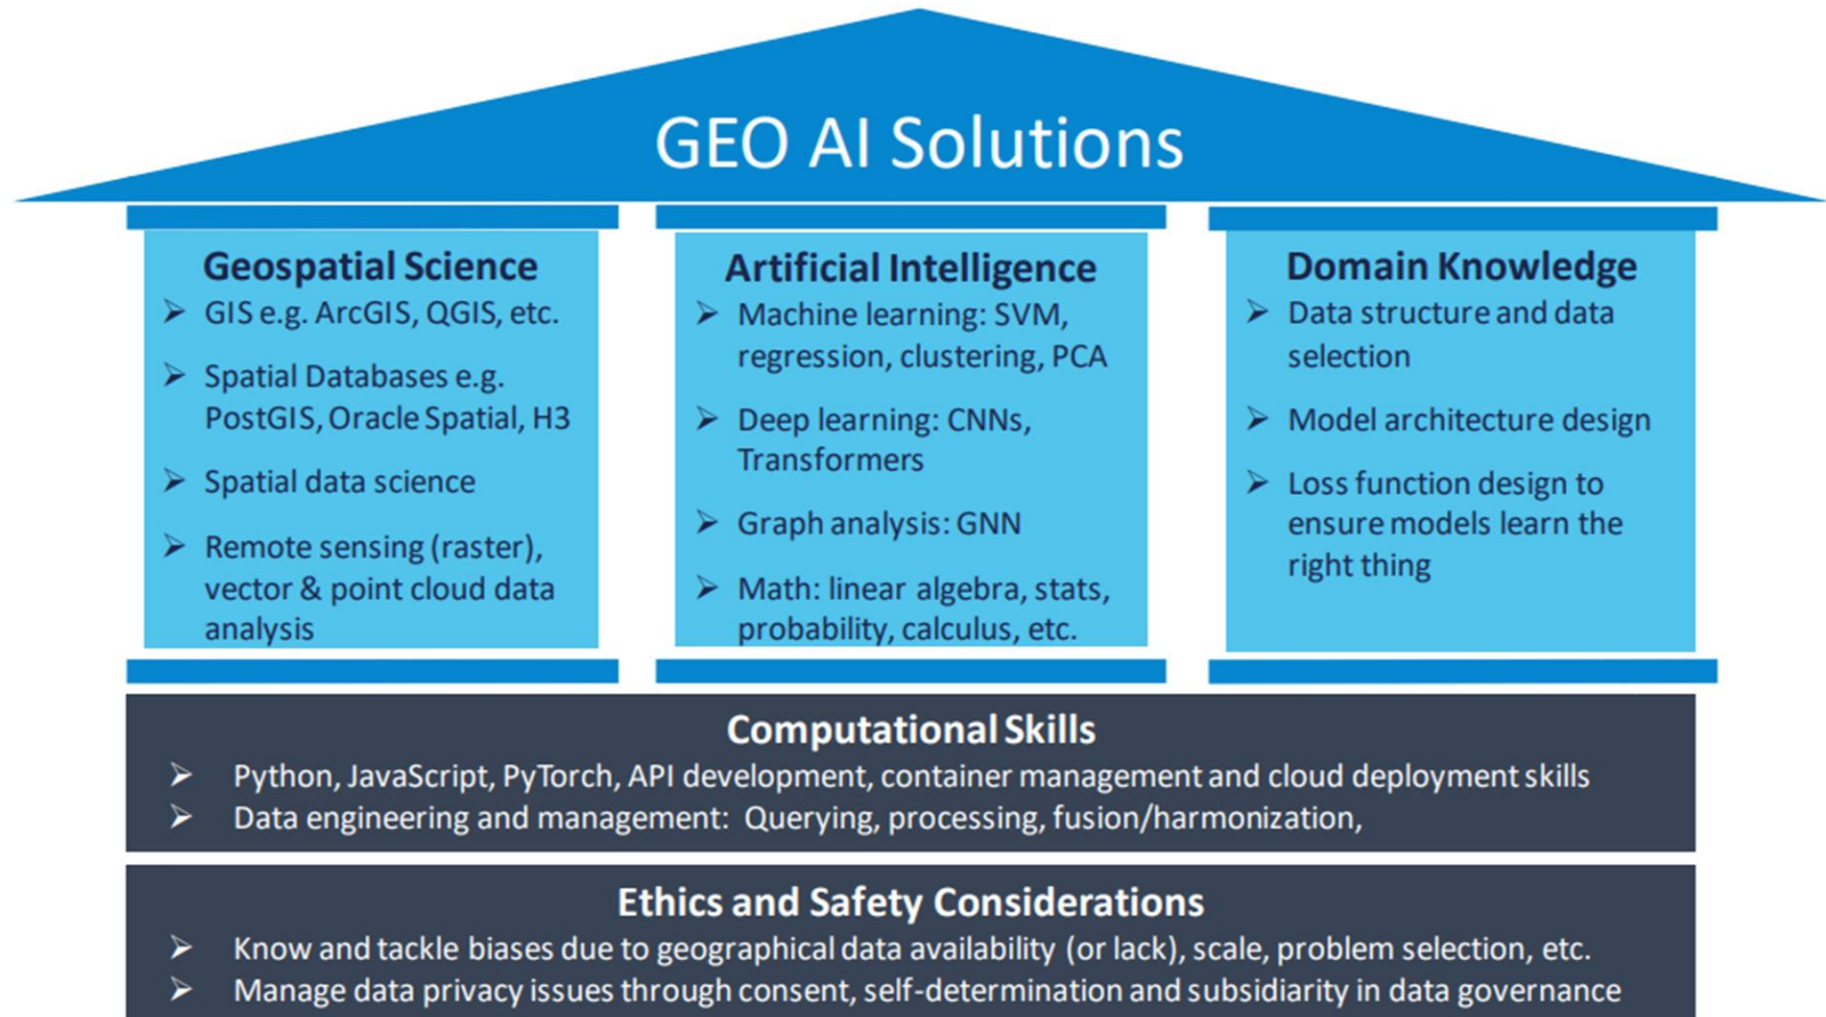

Easier to upskill Geo degree holders or Computer Science

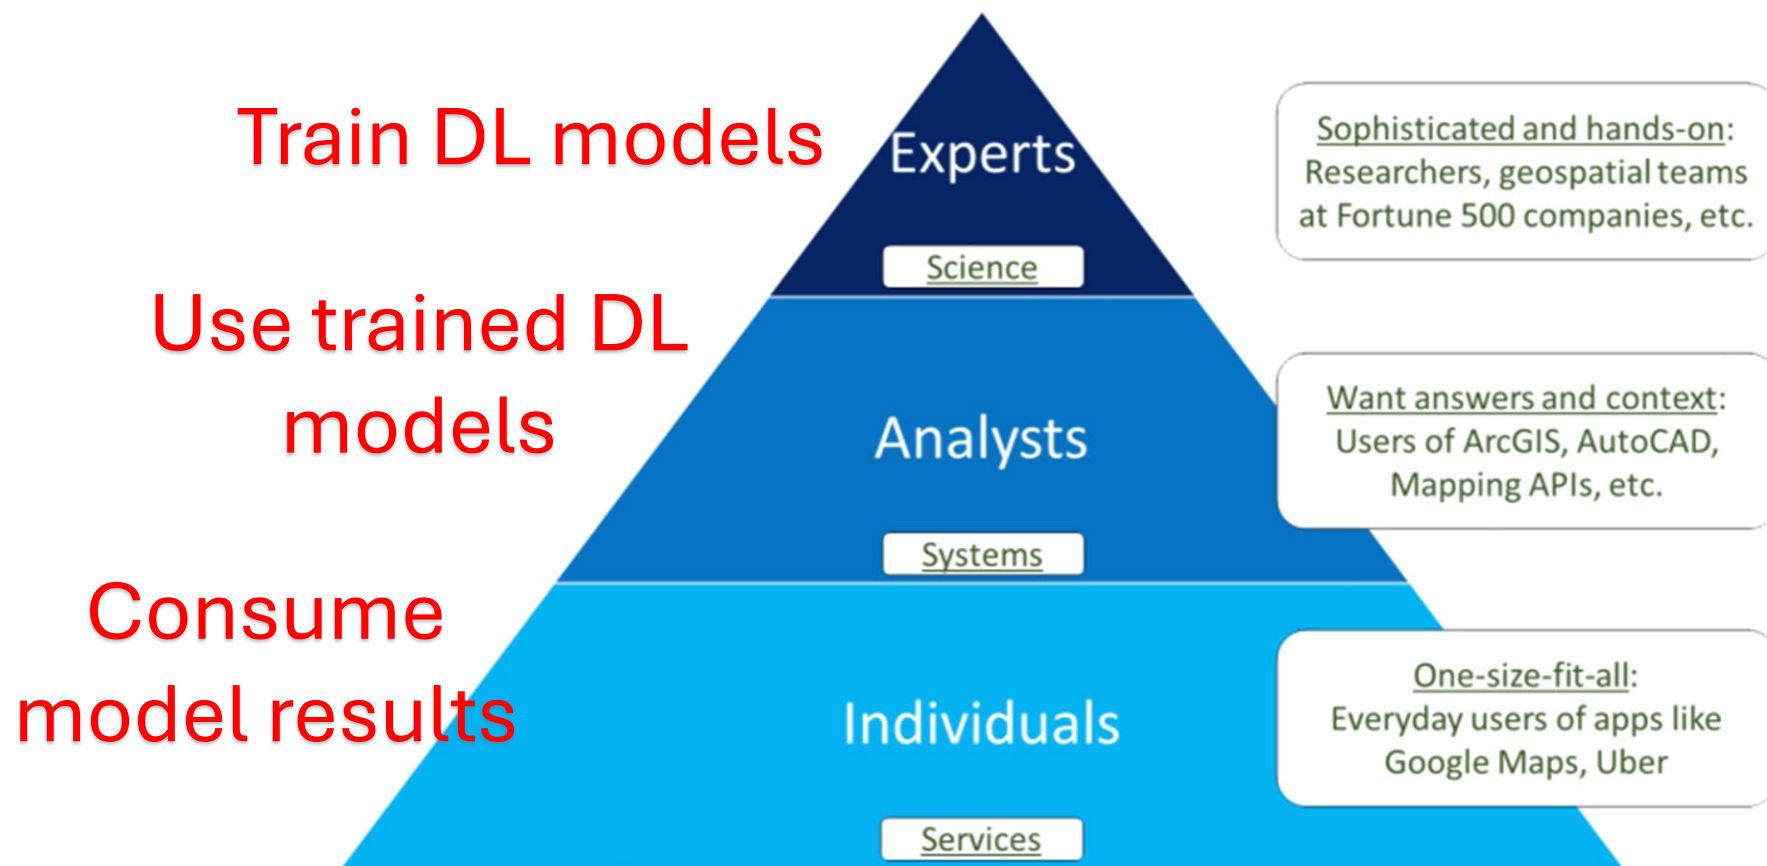

# Skills and Competencies Required

# Hierarchy of Geospatial Users

Next phase: Multimodal GeoAI foundation models (FM) for answering spatiotemporal and retrieval queries in natural language.

Question: When everyone becomes a GeoAI FM user, what kind curriculums would be required?

# Summary of Conclusions

- AI will affect the work of UN-GGIM and IGIF.
- GeoAI is in widespread demand.
  - Traditional GeoAI (data capture) and Assistants (LLMs)
- Industry Upskilling is Common: Academia can do more.
- Greater collaboration needed btw Public (incl. Univs) & Private Sectors, Governments, UN.
  - Communication of the importance
  - Capacity Development
  - Agreements on Ethics, Policy
