

# Challenges in Responsible AI Implementation in Health and Social Care

Responsible Ai UK (RAi UK) is a Research, Skills, and Innovation

Find out more at [RAI.AC.UK](https://rai.ac.uk)

RAI NHS AI CHAMPIONS

## Governance and Evaluation:

- Fragmented decision-making
- Absence of a shared framework
- Post-market surveillance deficiencies
- Unclear liability structures
- Regulatory complexity

## Workforce Readiness:

- Limited AI literacy
- Curricula gaps
- Workforce replacement anxieties
- Change in work practices

## Funding models and Procurement:

- Short-term funding cycles
- Evidence/Investment paradox
- ROI demonstration
- Research funding imbalance (favours innovation)

## Health Equity and Patient-centred approaches:

- Implementation disparities
- Digital exclusion risk
- Algorithmic bias concerns
- Insufficient patient involvement
- Disparities in patient trust
