

A new species has entered the world.

Not he. Not she. It.

Classify to Govern

No taxonomy, no governance.

Differentiate on lifecycle, purpose, technology, and legal standing.

Like Carl Linnaeus' Systema Naturae - Homo sapiens, Canis lupus.

Grant an Identity

Not one claim. Not one authority.

A web-of-trust with inherited, assigned, and self-asserted claims.

Like human identity in society.

Enable Agreement

Agents must be able to act on our behalf. Across legal systems.

Neutral protocols. No built-in advantage.

Like ICAO for international travel.
